

Camera (Init)

Render

1. Scan Image

2. Sample One Pixel

3. Trace Each Sample

각 Ray는 픽셀 내 랜덤한 위치에서 시작

4. Average & Write Color

$$\text{Red} + \text{Blue} + \text{Green} + \dots = \text{Orange}$$

$$\text{pixel Color} = C_1 + C_2 + \dots + C_n$$

$$\frac{\text{pixel Color}}{\text{Sample Per Pixel}} = \text{Final Color}$$

Write Color

Ray Color

Material (Scatter)

Lambertian

direction = normal + Random
attenuation = albedo

Metal

direction = Reflect + fuzz
attenuation = albedo

Dielectric

direction = Reflect or Refract
attenuation = (1, 1, 1)
